

## BMA – Flash – January 2017

The BAM-Flash appears to the edge of year 2017, at the very moment when occurred a big reshaping of the site, reorganized around two series of six magazines(reviews), a series in French (BAM - RAM - RAM-H - EA- RCT - CLB), a series in English (BMA - JMA - JMA-H – JTC - JBM). The BMA-Flash is designed as a complement and an intermediary between the BMA-Astralities of the year - who contains only paintings, graphs and charts without comments - and the BMA-Annual, which includes articles developing news headlines on the double plan of the current global analysis of cycles and the geo-political analysis. In brief : the BMA-Astralities is dumb and articles put down in the BMA-Annual often take several days of preparation to propose developed analyses. Between the two, it seemed that there was place for a more flexible and faster formula, allowing an immediate comment of the current events, in time of need. For example, following a striking, happy or dramatic event or upon a personality gaining focus.

The BMA-Flash will also serve to present, at the beginning of every month the global configurations which deserve the attention of the practitioners of the mundane astrology in the next few weeks. Allowing to bring, briefly, some clarifications to tables and in charts presented within the framework of the BMA-Astralities.

So much, for a start, the birth chart of the BMA-Flash :

The BMA-Flash is born at the time of the opposition Jupiter-Uranus, with Jupiter in the Ascendant and Uranus to the Descendant, at the mid-point Jupiter/Uranus being situated on the IC and so training the figure Jupiter/Uranus=MC, connected with the conjunction Mars-Neptune in Pisces (in M. V), in the conjunction Zeus-Jupiter (in M. I) and in both axes Sun/ Apollo and Kronos/Apollo.

It is necessary to recognize that the overall picture is really promising, the axis Jupiter/Uranus could mean chance, sudden prosperity, success (except for the case where Jupiter would be badly configured). It is about getting success and recognition, in particular in the field of the astrology (axis Kronos/Apollon=Uranus). So wish the BMA-Flash well and long life!

**January 2017**

### **TRANSIT OF THE SUN ON THE ZONE OF THE OPPOSITION JUPITER-URANUS AND OF THE SQUARE PLUTO-ZEUS**

From the 6th to the 11th January, the Sun will be in conjunction with Pluto in Capricorn, then with the axis Jupiter/Uranus. If it happens that the conjunction Sun-Pluto often coincides with deaths of striking personalities, the activation of the axis Jupiter/Uranus by the Sun may favour a capacity of transformation and regeneration. The transit of the Sun on the axis Pluto/Zeus could indicate the beginning of something new.

At the same time, Neptune will be at the mid-point of Venus/Mars, in Pisces and in opposition to Kronos/Apollo : possibility of scientific advances in unknown fields, but also risk of insecurity in the economic life.
